

## **Accessing Donnie Neal's "Little Sermons" from a Smart Phone**

Donnie's Little Sermons can be accessed from a home computer (PC or Mac), a public computer, or a smart phone. These instructions describe how to access them from a Smart Phone. Please follow the steps below:

Your phone will need to have data access through a Wi-Fi connection or your cellular provider.

First download and install the phone app from the appropriate App Store. It is called "My Cloud" for Apple, "WD My Cloud" for Android, and "WD To Go" for Windows Phone. The app is free. After it is downloaded and installed, then contact Brother Nick for a login code (see below).

Once you have the code, then launch the app, and choose "Manual Access". It will request the code number. You will only need to enter it one time to gain access. Please enter the code within 2 days of receiving it as it will expire and you'll have to request another code in case it does.

Once you gain access, you will see the shares. Navigate into the "Daystar" share to reach the sermons. They are sorted by year with the sermons named by date and title.

Notes: WD My Cloud may ask if you would like to backup your photos. Please choose "Decline", as you probably don't want copies of your photos on my network drive. Also, if you replace your phone, you may need to repeat this procedure on your new phone.

Contact info for Brother Nick: Text at 812-604-0723, or email at [computerghod@gmail.com](mailto:computerghod@gmail.com). Simply state that you need to get a code to access the sermons. He will reply with a code usually within a day.
